

Effective Outcome

This situation successfully demonstrates the effectiveness of Intrado's Wireless E9-1-1 comprehensive solution. With the Phase II solution deployed just one month prior to the incident, Brown County was able to dispatch emergency responders to the precise location of the accident and the caller was able to get the help he needed quickly.

Intrado® E9-1-1 Wireless Services

Intrado combines Mobile Positioning Center, Coordinate Routing Database, Position Determination Entity and Wireless Gateway service in a single, comprehensive solution.

Intrado's comprehensive deployment process includes switch integration, data gathering, 9-1-1 database provisioning, database monitoring and maintenance, PSAP boundary creation, PSAP mapping, PSAP relationship management, and wireless carrier cost-recovery assistance.
