

# Direct Voice Termination

TELECOM SERVICES

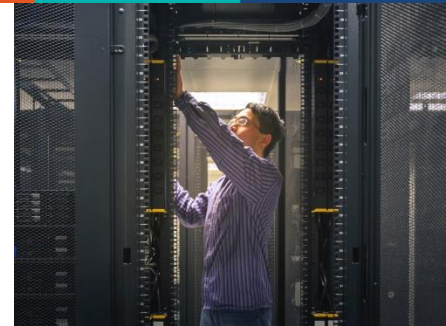

Reliable, high quality voice termination services at competitive rates—that's what you can expect with our Direct Voice Termination service.

**West's Direct Voice Termination services leverage our extensive network of interconnections to transport calls to domestic and select international destinations.**

## EXTENSIVE INTERCONNECTIONS. CARRIER GRADE SERVICE.

- PERFORMANCE. Our service includes enhanced fault tolerance with automatic network re-routing capabilities.
- FLEXIBILITY. We have extensive geographic interconnection options and our soft switch architecture supports accelerated rollouts.
- EASY TO USE ONLINE REPORTING TOOLS. Our web-based network monitoring tools give customers real-time views of network utilization and performance measurements. These reporting tools can be customized to meet your unique needs.

## West Telecom Services

- Trusted by the nation's leading carriers for Toll Free Origination services
- Next-generation network is protocol and traffic type agnostic
- Licensed CLEC and FCC 214 carrier

**3** Over 3 billion calls processed each month

**48** Licensed carrier in 48 states

## Direct Voice Termination

### BENEFITS

- **Competitive rates.** Cost savings realized via intelligent routing engine.
- **Customized plans.** Routing and pricing plans are tailored to suit your specific routing needs and traffic types.
- **Flexible connectivity.** Dedicated IP, public IP and traditional TDM—you choose the interconnection schema that fits your needs.
- **Capable network.** West owns and operates redundant switches across the country from Los Angeles to New York. Our network reliability is why the leading wireless and competitive service providers in the U.S. trust West to terminate their toll free and long distance traffic.

### FEATURES

- Near real-time traffic reporting
- Full database support—LNP, 8YY and more
- Full Call Detail Records (CDRs) available
- 24-hour monitoring by our network operations center (NOC)

West Telecom Services aggregates call traffic and connects networks, giving service providers a flexible, reliable and custom solution for carrier-to-carrier traffic exchange. By delivering interconnection solutions for all types of providers, including wireless, wireline, cable and voice over Internet protocol (VoIP), West established itself as a leading provider of tandem switching and toll free services.

We operate a next-generation network of Class 4 and 5 switches strategically located to provide complete coverage of the U.S. and surrounding territories throughout the North American Numbering Plan (NANP). Our carrier-grade interconnection solutions are cost effective and merge traditional telecom, mobile and IP technologies onto a common, efficient backbone.
