

INTERCALL MOBILEMEET

A CLEVER APP FOR YOUR SMART DEVICE

Don't miss a thing when you are away from your office and stay connected with total independence from your desktop.

MobileMeet® is the cornerstone of on-the-go InterCall Reservationless-Plus meetings. Discover a full-circle approach to meeting from your iPhone and Android smartphone. Not only start and join meetings, but enjoy a richer conferencing experience by sending meetings invites and accessing your enabled features. Enhance your meetings with this powerful functionality:

VOICE OVER IP (VOIP)

Use VoIP to talk and control your meetings with carriers not supporting simultaneous talk and data (e.g., Sprint) or when traveling internationally to avoid high voice roaming charges.

CHAT

Add a new level of engagement between you, participants and their peers with the in-meeting chat feature.

PASSWORD PROTECTION AND PROVISIONING

Increase meeting security by setting a required application password for all accounts within your organization that can be set to expire periodically. For assistance, please contact your sales rep.

PUSH NOTIFICATIONS

Receive push notifications when someone first enters your waiting room and again after five minutes of inactivity as a reminder to start your meeting.

NATIVE CALENDAR INTEGRATION

See when you have a free moment and the ability to schedule a meeting by using the in-app calendar to view appointments scheduled on your device's native calendar.

FAVORITE MEETING PROFILES

Store an unlimited number of unique meeting profiles to your favorites for quick access—retrieve global dial-in numbers and connect with one tap.

PARTICIPANT AND WAITING ROOM VIEW

View participants in your meeting or waiting for your approval to join your meeting by easily navigating between the Participant and Waiting Room view tabs.

MANAGEMENT AND CONTROL

Maintain total meeting control with in-app features—mute, unmute, rename, disconnect all or individual participants and much more.

Our favorite features:

- Connect to your meetings and save mobile minutes using VoIP instead of Call Me or Dial-In.
- Access your complete list of designated local and international dial-in numbers.
- Co-brand the app with your company logo or colors for maximum impact.
- Invite participants via SMS, email or Call Now within your meeting.
- Integrate with SIRI on iPhones.
