

Direct Inward Dial

West aggregates your traffic and delivers it over a single source IP interconnection. You can eliminate multiple facilities, while at the same time eliminating the need to build out your network to manage a local presence. All of which directly translates to significant savings and a shorter time to market.

West Telecom Services' DID features include:

- Coverage area of over 3,300 rate centers located in 48 key LATAs across 34 states
- Competitive metered and non-metered pricing
- Complimentary, easy-to-use traffic reporting and monitoring tools
- Capable of adding CNAM content to numbers 

Why should you choose West DID?

- Geographically diverse network interconnections provide a reliable, highly efficient and scalable way to deliver calls to any location.
- Simple and flexible pricing includes metered and non-metered pricing options.
- West Telecom Services is a licensed CLEC and FCC 214 carrier with a national network of soft-switches

West's wholesale DID numbers are a simple solution backed by a secure network.

- **Inbound and outbound calling capability**
- **Proprietary traffic reporting and monitoring tools**
- **Metered and non-metered pricing options**
- **SMS Text capability available**
