

Terminating Access Tandem

A competitive Access Tandem interconnection solution

With West's Terminating Access Tandem Homing solution, your access traffic does not have to be routed through the ILEC access tandem.

Homing your codes and traffic behind West Telecom Services' tandems allows you to set up an interconnection architecture that meets your needs—not the ILEC's.

Features and Benefits

- Near real-time traffic reporting
- Customizable traffic studies
- Full Database Support – LNP, 8YY and more
- Full CDRs available – CABS, MECAB data

Savings

- Decommission facilities to the ILEC
- Optimize your routing with an efficient IP network platform
- Reduce the number of suppliers in your network
- Free up your teams to focus on your customers
